Certifications:	Must pass a national certification examination from the Liaison Council on Certification for Surgical Technologists (within 6-months of hire) and follow continuing education requirements to maintain Certification, current CPR certification.

621-650 Cardiovascular Technologist/General/Echo/Cath Lab

Description:	Use cardiovascular technology evaluation procedures such as electrocardiography (ECG), Holter monitoring, cardiac ultrasound and echocardiography, exercise stress testing and pacemaker evaluation to observe, monitor and evaluate cardiac function.
Education:	Associate's Degree in cardiovascular technology
Experience:	Two-years experience performing cardiovascular tests in a supervised setting.
References:	Positive reference verification.
Certifications:	Current CPR certification

621-050 Computed Tomography Technologist

Description:	The CT Technologist produces images of the parts of the human body for use in diagnosing and monitoring medical problems. The technologist works effectively in both inpatient and outpatient settings, maintains a collaborative relationship with patients, family members, physicians and coworkers.
Education:	Graduation from an accredited radiography program and either current ARRT registration, state licensure or eligible for certification testing
Experience:	One-year performing CT Scans on a full time basis in the last three years or eligibility for ARRT Advanced Clinical Certification testing.
References:	Excellent supervisory and professional references.
Certifications:	Current CPR certification.

621-050 MRI Technologist	
Description:	The MRI Technologist follows established procedures and guidelines while performing a wide variety of Magnetic Resonance Imaging Examinations for our client facilities. The technologist produces high quality diagnostic images on patients of all age groups.
Education:	Completion of American Registry of Radiologic Technologist (A.R.R.T.). Certificate in Magnetic Resonance Imaging preferred.
Experience:	One-year full time experience within the last year, or ARRT-MR certification.
References:	Two positive qualitative references.
Certifications:	Current CPR certification.

621-050 Mammographer	
Description:	Mammography technologists perform specialized examinations of the breast to help in the diagnosis and treatment of breast disease in female patients for our client facilities. Mammographers may perform screening exams or diagnostic exams on the patients.
Education:	ARRT-M certified.
Experience:	One-years experience as Radiology technologist and successful registration as mammographer.
References:	Two positive qualitative references.
Certifications:	Current CPR certification

621-050 Nuclear Medicine Technologist	
Description:	Nuclear medicine technologists administer the radiopharmaceuticals to patients to be used in diagnosis and treatment of diseases of the patients for our clients requiring specific diagnostic testing to diagnose or treat their disease. The nuclear medicine technologist operates the cameras that detect and map the radioactive drug in the patient's body to create an image on photographic film or a computer monitor. The Nuclear Medicine Technologists works in the Radiology Departments for our client facilities.
Education:	Certificate programs offered in hospitals, Associates degree in community colleges, Bachelor program in colleges and universities. Course must include: physical science, the biological effects of radiation exposure, radiation protections and procedures, the use of radiopharmaceuticals, imaging techniques and computer applications. Must meet the minimum Federal Standards on the administration of radioactive drugs and the operation of radiation detection equipment.
Experience:	One-year full time experience/employment within the last

	three years.
References:	Two positive qualitative references.
Certifications:	Current CPR certification.

621-050 Radiation Therapist/Radiological Therapeutic Technologist (RRT)

Description:	The Radiologic Technologist produces radiographs of parts of the human body for use in diagnosing and monitoring medical problems. The technologist works effectively in both inpatient and outpatient settings, maintaining a collaborative relationship with patients, family members, physicians and coworkers.
Education:	Graduation from an accredited radiography program and either current ARRT registration, state licensure or eligible for certification testing.
Experience:	A minimum of one-year of current clinical experience.
References:	Excellent supervisory and professional references.
Certifications:	Current CPR certification.

621-050 Diagnostic Imaging/Radiographer/X-Ray

Description:	The Diagnostic Imaging/Radiographer/X-Ray Technologist produces radiographs of parts of the human body for use in diagnosing and monitoring medical problems. The technologist works effectively in both inpatient and outpatient settings, maintaining a collaborative relationship with patients, family members, physicians and coworkers.
Education:	Graduation from an accredited radiography program and either ARRT registration, state licensure or eligible for certification testing.
Experience:	At least one-year of current clinical experience.
References:	Excellent supervisory and professional references.
Certifications:	Current CPR certification.

621-050 Sonography/Ultrasound (abdomen, OB/GYN, vascular & Cardiac)

Description:	Cardiac Echo Technologist/sonographers are technologists who use ultrasound to examine heart chambers, valves and vessels. They use ultrasound instrumentation to create images. Cardiac technologists may administer medication to a physically active patient. Cardiac sonographers may also assist physicians who perform transesophageal echocardiography, which involves placing a tube in the patient's esophagus to obtain ultrasound images. The Echo technician may work in the Radiology Department for our client facilities.
Education:	2-4 year junior or community college program, on-the-job education/experience.
Experience:	One-year full time experience within the last three years or

	ARDMS-RDCS certification.
References:	Positive reference verification
Certifications:	ARDMS-RDCS certification preferred. Areas of specialty may include: Obstetric and Gynecologic: specializing in the study of the female reproductive system. Including the examination of the fetus of a pregnant woman to track its growth and health during pregnancy. Abdominal Sonographers: specializing in the study of the patient's abdominal cavity to help diagnose and treat conditions involving primarily the gallbladder, bile ducts, kidneys, liver, pancreas and spleen. Neurosonographers: specializing in the study of the nervous system, including the brain. In neonatal care, the sonographers study and diagnose neurological and nervous system disorders in premature infants. Ophthalmologic sonographers: specializing in the study of the eyes. Ultrasound aids in the insertion of prosthetic lenses by allowing accurate measurement of the eyes. Ophthalmologic ultrasound also helps diagnose and track tumors, blood supply conditions, separated retinas and other ailments of the eye and the surrounding tissue.

621-050 Radiologic Technology Other-Patient Care Technician

Description:	The Patient Care Technician assists in providing care and a variety of procedures, such as EKG's, phlebotomy and minor occupational and physical therapy on a supplemental staffing basis to our client facilities. The Patient Care Technician performs procedures and patient care tasks as assigned by the facility under the direction of a Nurse or Physician.
Education:	High school graduate or equivalent with science background, successful completion of a nursing assistant course with emphasis in EKG's, phlebotomy and minor occupational and physical therapy.
Experience:	Acute Care: 6-months within the last three years; Nursing Home: 6-months within the last three years; Nursing students: Completion of 3 clinical rotations or completion of nursing fundamentals, as verified via transcripts or clinical instructor.
References:	Positive reference verification
Certifications:	Current CPR certification.

621-051 Certified Pharmacy Technician

Description:	Performs all nonprofessional (administrative) aspects in the department, accountable for clerical duties that do not require professional judgment or extensive technical training.
Education:	Successful completion of a pharmacy technician training course or the equivalent skills acquired through informal training and experience, high school diploma or equivalent;

	pharmacy technician certification preferred.
Experience:	Hospital: one-year full time experience within the last three years. Retail: 6-months full time experience within the last three years.
References:	Positive reference verification.
Certifications:	Pharmacy technician certification preferred.
